Advanced Walking Bass Lines for Jazz Guitar explores the creation of walking bass lines played over chord sequence using scale tones and chromatic movements.

This is the usual third step for players who want to master walking.

A progressive approach is used to introduce walking bass technique: we start with a preliminary section to approach chromatic walking bass lines on a single chord progression.

In the second part we present lines related to most common jazz progressions. In our examples a bass line is added above chord (in this case drop2 and drop3 voicing are used) progression. Playing also suggested chord position is a good exercise for solo guitar.
