The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) By Nicos Komninos

This book concludes a trilogy that began with *Intelligent Cities: Innovation, Knowledge Systems and digital spaces* (Routledge 2002) and *Intelligent Cities and Globalisation of Innovation Networks* (Routledge 2008). Together these books examine intelligent cities as environments of innovation and collaborative problem-solving. In this final book, the focus is on planning, strategy and governance of intelligent cities.

Divided into three parts, each section elaborates upon complementary aspects of intelligent city strategy and planning. Part I is about the drivers and architectures of the spatial intelligence of cities, while Part II turns to planning processes and discusses top-down and bottom-up planning for intelligent cities. Cities such as Amsterdam, Manchester, Stockholm and Helsinki are examples of cities that have used bottom-up planning through the gradual implementation of successive initiatives for regeneration. On the other hand, Living PlanIT, Neapolis in Cyprus, and Saudi Arabia intelligent cities have started with the top-down approach, setting up urban operating systems and common central platforms. Part III focuses on intelligent city strategies; how cities should manage the drivers of spatial intelligence, create smart environments, mobilise communities, and offer new solutions to address city problems.

Main findings of the book are related to a series of models which capture fundamental aspects of intelligent cities making and operation. These models consider structure, function, planning, strategies toward intelligent environments and a model of governance based on mobilisation of communities, knowledge architectures, and innovation cycles.

Editorial Review

Review

The Age of Intelligent Cities book trilogy is truly a magnificent piece of work with conceptual and empirical elements interwoven to produce the emerging fabric and thread for 21st century theories, policies and practices related to and focusing on how more than two out of three of humans live, work, play and hopefully survive and prosper: in the small, medium and mega-size urban centers on planet earth. Science, technology, innovation and entrepreneurship empowered by knowledge and creativity are the essential elements of the intelligent cities of the future and will thus define and shape the age we are entering following the information revolution age: this is the age of the smart city and this book will serve as our intellectual compass to navigate our way towards an era where hopefully "technological intelligence" will be in harmony with and accompanied by human, social and political enlightenment.

Professor Elias G. Carayannis, George Washington University, USA.

The Age of Intelligent Cities provides a comprehensive view of the shaping of urban intelligent environments. The way it outlines technological trends and puts them into a wider context is unsurpassed. The book is universal in scope, well arranged, and insightful, providing tools for understanding and planning intelligent cities. It is a definitive landmark that deserves to gain a wide readership and a must for both academics and practitioners concerned with our urban future.

Professor Ari-Veikko Anttiroiko, University of Tampere, Finland.

Nearly all of texts published so far on intelligent cities and smart environments are edited books, capturing the state-of-the-art within the field. Sole authored books written to push beyond this and force a step change in understanding and knowledge are rare. So it is a particular pleasure to come across one written by an academic of standing, who bases their representation of the ongoing debate over intelligent cities and smart environments on the findings of successful research projects. As a result, the singular insights this book on intelligent cities offers are turnkey and allow much of the material already published on smart environments to be integrated as part of an overarching and authoritative narrative.

Professor Mark Deakin, Edinburgh Napier University, UK.

About the Author

Nicos Komninos is Professor of Urban Development and Innovation Policy at the Aristotle University of Thessaloniki, Greece.

Users Review

From reader reviews:

Alberta Sanchez:

Here thing why this specific The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) are different and trusted to be yours. First of all studying a book is good nevertheless it depends in the content of it which is the content is as yummy as food or not. The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) giving you information deeper and in different ways, you can find any e-book out there but there is no book that similar with The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities). It gives you thrill reading journey, its open up your current eyes about the thing in which happened in the world which is maybe can be happened around you. You can easily bring everywhere like in park your car, café, or even in your approach home by train. For anyone who is having difficulties in bringing the published book maybe the form of The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) in e-book can be your substitute.

John McCraw:

The actual book The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) will bring you to the new experience of reading any book. The author style to describe the idea is very unique. In the event you try to find new book to learn, this book very appropriate to you. The book The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) is much recommended to you to read. You can also get the e-book from your official web site, so you can quickly to read the book.

Jack Nguyen:

Reading can called mind hangout, why? Because when you find yourself reading a book particularly book entitled The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) your head will drift away trough every dimension, wandering in every aspect that maybe mysterious for but surely will end up your mind friends. Imaging each word written in a book then become one web form conclusion and explanation which maybe you never get prior to. The The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) giving you yet another experience more than blown away your thoughts but also giving you useful facts for your better life in this era. So now let us explain to you the relaxing pattern here is your body and mind will likely be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

Harold Singleton:

The book untitled The Age of Intelligent Cities: Smart Environments and Innovation-for-all Strategies (Regions and Cities) contain a lot of information on the idea. The writer explains your girlfriend idea with easy way. The language is very straightforward all the people, so do not really worry, you can easy to read

the item. The book was compiled by famous author. The author will take you in the new era of literary works. It is easy to read this book because you can continue reading your smart phone, or model, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can start their official website and order it. Have a nice study.
