Carbon Accounting and Savanna Fire Management By Brett. Murphy

In the context of Australia's developing carbon economy, fire management helps to abate emissions of greenhouse gases and is an important means of generating carbon credits. The vast high-rainfall savannas of northern Australia are one of the world's most flammable landscapes. Management of fires in this region has the potential to assist with meeting emissions reduction targets, as well as conserving biodiversity and providing employment for Indigenous people in remote parts of Australia's north.

This comprehensive volume brings together recent research from northern Australian savannas to provide an internationally relevant case study for applying greenhouse gas accounting methodologies to the practice of fire management. It provides scientific arguments for enlarging the area of fire-prone land managed for emissions abatement. The book also charts the progress towards development of a savanna fire bio-sequestration methodology. The future of integrated approaches to emissions abatement and bio-sequestration is also discussed.

Editorial Review

About the Author

Brett Murphy is a tropical fire ecologist, whose work focuses on the broad question of how to optimally manage landscape fire for the conservation of biodiversity, especially in the vast savanna landscapes of northern Australia.

Andrew Edwards is a fire ecologist and remote-sensing specialist.

Mick Meyer is the author of the current national accounting methodologies for greenhouse gas emissions from bushfires, and is an active contributor to UN and IPCC accounting methodologies for combustion processes.

Jeremy Russell-Smith is a consultant ecologist with 25 years' experience in northern Australia. He coordinates fire research programs for the Tropical Savannas CRC and works on other natural resource management projects in South-East Asia. He has an abiding interest in the ecology, biogeography and management of monsoon rainforests and sandstone heaths. He often works with Indigenous people on landscape and resource management issues.

Users Review

From reader reviews:

Joan Henderson:

Have you spare time for any day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a stroll, shopping, or went to the actual Mall. How about open or read a book entitled Carbon Accounting and Savanna Fire Management? Maybe it is being best activity for you. You recognize beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have other opinion?

Susan Crowell:

In this 21st centuries, people become competitive in most way. By being competitive right now, people have do something to make all of them survives, being in the middle of typically the crowded place and notice through surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. That's why, by reading a guide your ability to survive enhance then having chance to endure than other is high. For you personally who want to start reading a new book, we give you this kind of Carbon Accounting and Savanna Fire Management book as basic and daily reading e-book. Why, because this book is more than just a book.

Harriette Corwin:

Nowadays reading books be than want or need but also become a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book which improve your knowledge and information. The details you get based on what kind of guide you read, if you want attract knowledge just go with training books but if you want truly feel happy read one with theme for entertaining such as comic or novel. Typically the Carbon Accounting and Savanna Fire Management is kind of guide which is giving the reader unpredictable experience.

Beth Johnson:

What is your hobby? Have you heard this question when you got learners? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person like reading or as reading through become their hobby. You need to know that reading is very important along with book as to be the point. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You find good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is Carbon Accounting and Savanna Fire Management.
