## Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods By Kay S. Greisen

Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods is an illustrated laboratory manual that describes in easily understood language the stepwise process of propagating orchids from seed via 'seed flasking,' a technique based on tissue-culture technology. The methods described include Preparation of: Green Pod for Seed Sowing; Split Pod for Dry-Seed Sowing; Spread Flask; and Replate Flask.

This informative volume also presents: pros-and-cons of seed flasking versus cloning; detailed descriptions of media, their components, and preparation; guidelines to using sterile technique; and a photographic life cycle of orchids grown in seed flasks. An invaluable appendix presents an 8-page table of orchid-pod collection times, including 471 species/hybrids among 124 genera. A glossary and comprehensive index complete the book. This book won an Award of Excellence from The Intermountain Chapter of The Society for Technical Communication in its 2000–2001 Publications Competition.

A removable 8.5"x14" tri-fold companion Quick Reference Guide summarizes all the media and propagation methods presented in greater detail within the book. It guides the user bench-side after he's read and studied the manual.

Comb-bound, softcover book easily lies flat or folds. 8.5"x11" format. 53 B&W photographs. 63 pages.

### **Editorial Review**

#### **About the Author**

Kay S. Greisen worked most of her professional life as a biotech scientist in both academia and industry before re-training for a career change to technical writer/communicator and publisher. While earning a Certificate in Technical Communication, she wrote an STC-award-winning, illustrated laboratory manual on growing orchids from seed in tissue culture, a technique known as 'seed flasking.' She later self-published that book, which the American Orchid Society added to its booklist.

### **Users Review**

#### **From reader reviews:**

##### **Cleveland Bolton:**

Here thing why that Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods are different and dependable to be yours. First of all examining a book is good nevertheless it depends in the content of the usb ports which is the content is as delightful as food or not. Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods giving you information deeper as different ways, you can find any guide out there but there is no guide that similar with Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods. It gives you thrill reading journey, its open up your current eyes about the thing which happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park, café, or even in your method home by train. When you are having difficulties in bringing the printed book maybe the form of Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods in e-book can be your option.

##### **Nancy Hartsell:**

Typically the book Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods will bring that you the new experience of reading the book. The author style to spell out the idea is very unique. In the event you try to find new book to read, this book very suitable to you. The book Commercial Propagation of Orchids in Tissue Culture: Seed-Flasking Methods is much recommended to you to see. You can also get the e-book from official web site, so you can easier to read the book.

##### **Charles Howell:**

Reading a book being new life style in this calendar year; every people loves to learn a book. When you learn a book you can get a large amount of benefit.
