A (Patented) Heart Disease Cure That Works!: What Your Doctor May Not Know. What Big Pharma Hopes You Don't Find Out. By David H Leake

How to Reverse, Cure and Prevent Coronary Artery Disease. No Rx Required! Six months before his death 18 years ago, a 93-year-old genius gave mankind an incredible gift -- a simple, low-cost way to reverse, even cure, heart disease. To keep it in the public domain, he and an associate registered U.S. Patent #5278189 so that pharmaceutical companies could not control it. Instead, he was made out to be an old fool. A desperate heart patient -- allergic to all statin drugs -- decided three years ago he had nothing to lose, and opted to try it. I am that patient, and after an invasive angiogram procedure conducted July 27, 2011, an expert cardiologist reported my heart to be "free of obstructive disease." As you read this book you will learn: • Coronary Artery Disease can be reversed, cured and prevented • Cholesterol level is unrelated to heart disease • Statin drugs do not reduce death rates due to heart disease • Side effects of statin drugs are far more common than is being reported, and include permanent muscle damage, brain damage, loss of memory, and more Imagine the lives that can be extended, the suffering that can be prevented, when more people learn there already exists a safe and inexpensive cure for coronary artery disease. This book is for them, and YOU.

Editorial Review

About the Author

David H. Leake is a retired Naval Reserve Captain and public relations professional. He developed coronary artery disease at age 48. He has undergone two angioplasty procedures and has three stents permanently implanted in his heart. Every statin drug he was prescribed over several years eventually led to disturbing side effects. Lipitor was the last ... and worst. With no statin alternative remaining, he panicked. Nearly all his relatives had died of heart disease. Leake began an extensive search of the Internet, looking for any glimmer of hope. His quest finally led him to a 1994 patent, a cure for heart disease. In this book he reveals how following the regimen prescribed by that patent led to complete reversal of his coronary artery disease. He wants the world to know there really is an inexpensive, non-prescription treatment to prevent, reverse and cure heart disease, and possibly prevent strokes as well..

Users Review

From reader reviews:

Jeffrey Roybal:

In this 21st millennium, people become competitive in every single way. By being competitive now, people have do something to make these survives, being in the middle of typically the crowded place and notice through surrounding. One thing that often many people have underestimated the item for a while is reading. Yes, by reading a publication your ability to survive boost then having chance to stand up than other is high. For you personally who want to start reading some sort of book, we give you this particular A (Patented) Heart Disease Cure That Works!: What Your Doctor May Not Know. What Big Pharma Hopes You Don't Find Out. book as beginning and daily reading publication. Why, because this book is more than just a book.

Sherrie Smith:

As people who live in the modest era should be update about what going on or info even knowledge to make these people keep up with the era that is always change and move ahead. Some of you maybe will probably update themselves by studying books. It is a good choice for you but the problems coming to an individual is you don't know what type you should start with. The writer explains your ex idea with easy means. The language is very clear and understandable all the people, so do not worry, you can easy to read the idea. The book was authored by famous author. The author brings you in the new era of literary works. It is easy to read this book because you can read on your smart phone, or product, so you can read the

book with anywhere and anytime. If you want to buy the e-book, you can start their official web-site in addition to order it. Have a nice examine.

Raymond Guajardo:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some e-book, they are complained. Just little students that has reading's heart or real their interest. They just do what the professor want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this A (Patented) Heart Disease Cure That Works!: What Your Doctor May Not Know. What Big Pharma Hopes You Don't Find Out. can make you truly feel more interested to read.
