## Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world By Tom Igoe

**Make microcontrollers, PCs, servers, and smartphones talk to each other.**

Building electronic projects that interact with the physical world is good fun. But when the devices you've built start to talk to each other, things really get interesting. With 33 easy-to-build projects, *Making Things Talk* shows you how to get your gadgets to communicate with you and your environment. It's perfect for people with little technical training but a lot of interest.

Maybe you're a science teacher who wants to show students how to monitor the weather in several locations at once. Or a sculptor looking to stage a room of choreographed mechanical sculptures. In this expanded edition, you'll learn how to form networks of smart devices that share data and respond to commands.

- Call your home thermostat with a smartphone and change the temperature.
- Create your own game controllers that communicate over a network.
- Use ZigBee, Bluetooth, Infrared, and plain old radio to transmit sensor data wirelessly.
- Work with Arduino 1.0, Processing, and PHP—three easy-to-use, open source environments.
- Write programs to send data across the Internet, based on physical activity in your home, office, or backyard.

Whether you want to connect simple home sensors to the Internet, or create a device that can interact wirelessly with other gadgets, this book explains exactly what you need.

### **Editorial Review**

#### **About the Author**

Tom Igoe teaches courses in physical computing and networking, exploring ways to allow digital technologies to sense and respond to a wider range of human physical expression. He has a background in theatre, and his work centers on physical interaction related to live performance and public space. He is a co-author of the book *Physical Computing: Sensing and Controlling the Physical World with Computers*, which has been adopted by numerous digital art and design programs around the world. Projects include a series of networked banquet table centerpieces and musical instruments; an email clock; and a series of interactive dioramas, created in collaboration with M.R. Petit. He has consulted for The American Museum of the Moving Image, EAR Studio, Diller + Scofidio Architects, Eos Orchestra, and others.

### **Users Review**

#### **From reader reviews:**

##### **Eleanor Landa:**

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim or goal; it means that reserve has different type. Some people truly feel enjoy to spend their time to read a book. These are reading whatever they take because their hobby is actually reading a book. Why not the person who don't like examining a book? Sometime, man feel need book when they found difficult problem or exercise. Well, probably you will want this *Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world*.

##### **Paulette Rodriguez:**

Inside other case, little men and women like to read book *Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world*. You can choose the best book if you want reading a book. Providing we know about how is important any book *Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world*. You can add understanding and of course you can around the world by a book. Absolutely right, mainly because from book you can know everything! From your country until foreign or abroad you can be known. About simple issue until wonderful thing you are able to know that. In this era, we are able to open a book as well as searching by internet product. It is called e-book. You should use it when you feel fed up to go to the library. Let's read.

##### **Dave Arreola:**

People live in this new day time of lifestyle always make an effort to and must have the time or they will get great deal of stress from both daily life and work. So , if we ask do people have free time, we will say

absolutely indeed. People is human not only a robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to you of course your answer may unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, often the book you have read is usually Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world.

**Carol Stripling:**

Reading a book to become new life style in this yr; every people loves to read a book. When you examine a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, as well as soon. The Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world will give you new experience in reading through a book.
