Internet of Things with ESP8266 By Marco Schwartz

Key Features

- Get to know the powerful and low cost ESP8266 and build interesting projects in the field of Internet of Things
- Configure your ESP8266 to the cloud and explore the networkable modules that will be utilized in the IoT projects
- This step-by-step guide teaches you the basics of IoT with ESP8266 and makes your life easier

Book Description

The Internet of Things (IoT) is the network of objects such as physical things embedded with electronics, software, sensors, and connectivity, enabling data exchange. ESP8266 is a low cost WiFi microcontroller chip that has the ability to empower IoT and helps the exchange of information among various connected objects. ESP8266 consists of networkable microcontroller modules, and with this low cost chip, IoT is booming. This book will help deepen your knowledge of the ESP8266 WiFi chip platform and get you building exciting projects.

Kick-starting with an introduction to the ESP8266 chip, we will demonstrate how to build a simple LED using the ESP8266. You will then learn how to read, send, and monitor data from the cloud. Next, you'll see how to control your devices remotely from anywhere in the world. Furthermore, you'll get to know how to use the ESP8266 to interact with web services such as Twitter and Facebook. In order to make several ESP8266s interact and exchange data without the need for human intervention, you will be introduced to the concept of machine-to-machine communication.

The latter part of the book focuses more on projects, including a door lock controlled from the cloud, building a physical Bitcoin ticker, and doing wireless gardening. You'll learn how to build a cloud-based ESP8266 home automation system and a cloud-controlled ESP8266 robot. Finally, you'll discover how to build your own cloud platform to control ESP8266 devices.

With this book, you will be able to create and program Internet of Things projects using the ESP8266 WiFi chip.

What you will learn

- Control various devices from the cloud
- Interact with web services, such as Twitter or Facebook
- Make two ESP8266 boards communicate with each other via the cloud
- Send notifications to users of the ESP8266, via email, text message, or push notifications
- Build a physical device that indicates the current price of Bitcoin
- Build a simple home automation system that can be controlled from the cloud
- Create your own cloud platform to control ESP8266 devices

About the Author

Marco Schwartz is an electrical engineer, an entrepreneur, and a blogger. He has a master's degree in electrical engineering and computer science from Supélec, France, and a master's degree in micro engineering from the Ecole Polytechnique Fédérale de Lausanne (EPFL) in Switzerland.

He has more than five years of experience working in the domain of electrical engineering. Marco's interests gravitate around electronics, home automation, the Arduino and Raspberry Pi platforms, open source hardware projects, and 3D printing.

He has several websites about Arduino, including an open home automation website that is dedicated to building home automation systems using open source hardware.

Marco has written another book on home automation and Arduino, called *Home Automation With Arduino: Automate Your Home Using Open-source Hardware*. He has also written a book on how to build Internet of Things projects with Arduino, called *Internet of Things with the Arduino Yun*, Packt Publishing.

Users Review

From reader reviews:

Angela Taylor:

Inside other case, little people like to read book Internet of Things with ESP8266. You can choose the best book if you love reading a book. Provided that we know about how is important some sort of book Internet of Things with ESP8266. You can add know-how and of course you can around the world by a book. Absolutely right, due to the fact from book you can realize everything! From your country till foreign or abroad you can be known. About simple factor until wonderful thing you could know that. In this era, we could open a book or maybe searching by internet product. It is called e-book. You can use it when you feel uninterested to go to the library. Let's study.

Donald Lombard:

This Internet of Things with ESP8266 book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book will be information inside this book incredible fresh, you will get info which is getting deeper you read a lot of information you will get. This kind of Internet of Things with ESP8266 without we realize teach the one who examining it become critical in pondering and analyzing. Don't always be worry Internet of Things with ESP8266 can bring any time you are and not make your tote space or bookshelves' turn into full because you can have it with your lovely laptop even telephone. This Internet of Things with ESP8266 having fine arrangement in word and layout, so you will not experience uninterested in reading.

Carol Hamilton:

Your reading 6th sense will not betray you, why because this Internet of Things with ESP8266 book written by well-known writer who really knows well how to make book which might be understand by anyone who all read the book. Written inside good manner for you, dripping every ideas and publishing skill only for eliminate your hunger then you still skepticism Internet of Things with ESP8266 as good book not merely by the cover but also through the content. This is one e-book that can break don't assess book by its protect, so do you still needing a different sixth sense to pick this specific!? Oh come on your examining sixth sense already told you so why you have to listening to a different sixth sense.

Laura Burnham:

A lot of book has printed but it differs from the others. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever by simply searching from it. It is known as of book Internet of Things with ESP8266. You'll be able to your knowledge by it. Without making the printed book, it could add your knowledge and make anyone happier to read. It is most essential that, you must aware about guide. It can bring you from one place to other place.
