Perversion: The Erotic Form of Hatred By Robert J. Stoller

The main contention is that in perversion the main clinical factor is hostility. It combines with sexual desire to produce the various forms that perversion can take on. Stoller shows that the perverse scene aims not only at denying castration, but also at securing a more solid basis for a jeopardized sexual identity. Risk, vengeance and trauma are some of the ideas that the author discusses while building up his argument

Editorial Review

Review

Why in this enlightened day would one choose to entitle a work Perversion, a term that is becoming passe? The great research published in the last decade or two has taught us that aberrant sexual behavior is found in other species, is ubiquitous in man, and is the product of brain and hormonal factors that can function independently of anything we might call psyche. Then too, their findings make researchers regret society's moral stance that sexual aberration is unnatural - sinful - and the repressive social action that follows. Thus, in ridding ourselves of the concept of perversion, we have the tempting combination of good research serving a humane cause. Yet it is my contention, explored in the body of this book, that perversion exists. The connotations of the word are unpleasant and have a flavor of morality and therefore of free will that is antiquated in these days of science and determinism. It is to avoid such connotations that the softer terms "variant", "deviation," or "aberration" are used. More and more these days, decent people - many of them scientists - are concerned about the price their fellows, and even more, whole societies, pay in their effort to suppress victimless aberrant sexual behavior. And so, in the name of decency, it has become the style, using the trappings of Science, to try and get rid of the concept of perversion. This is done not only by changing the terms to ones with less severe implications but by trying to show that there are no (or very few) states that fit the nasty connotations of "perversion". These workers reach their conclusions by objective means that they feel avoid the dangers of introspective material, such as by studying brain mechanisms in an animal and man, which reveal capacities for aberrant behavior inherited and laid down in hormonal organizations of the central nervous system: by statistics that unmask how widespread are those allegedly heinous acts; by anthropological studies that show aberrant sexual behavior to have been the usual - not the exceptional - throughout history and across cultures; and by observation of or experimentation on intact animals. In all these cases, data have been gathered disclosing that aberrant sexual practices are found throughout the animal species and are ubiquitous in human behavior. It is easy, then, to conclude that the widespread aberrance in man does not really signify willed behavior - that is, sinfulness, disobedience to accepted morality - but rather a natural tendency of the sexual impulse in the animal kingdom. From the Introduction by the Author

About the Author

Robert J. Stoller M.D. was, until his death, Professor of Psychiatry at UCLA School of Medicine. His books on human sexuality include 'The Transsexual Experiment', 'Perversion: The Erotic Form of Hatred', 'Splitting: A Case of Female Masculinity', 'Porn: Myths for the Twentieth Century', 'Pain and Passion: A Psychoanalyst explores the World of S and M', 'Observing the Erotic Imagination' and 'Presentations of Gender'. Dr Stoller was a psychoanalyst but because he recognized the need to understand how biological forces contribute to the development of mental functions, he took account of the important work that had come out of the laboratories. He also emphasized the need for some psychoanalysts to include some of the findings and concepts of leading theorists if they are to understand better the origins and maintenance of the ground themes of personality, of which gender identity (masculinity and femininity) is certainly one.

Users Review

From reader reviews:

Debbie Davis:

Now a day folks who Living in the era wherever everything reachable by talk with the internet and the

resources included can be true or not call for people to be aware of each data they get. How individuals to be smart in getting any information nowadays? Of course the answer is reading a book.
