## **The Drug Book: From Arsenic to Xanax, 250 Milestones in the History of Drugs (Sterling Milestones)** By Michael C. Gerald

Throughout history, humans everywhere have searched for remedies to heal our bodies and minds. Covering everything from ancient herbs to cutting-edge chemicals, this book in the hugely popular Milestones series looks at 250 of the most important moments in the development of life-altering, life-saving, and sometimes life-endangering pharmaceuticals. Illustrated entries feature ancient drugs like alcohol, opium, and hemlock; the smallpox and the polio vaccines; homeopathic cures; and controversial medical treatments like ether, amphetamines, and Xanax—while shining a light on the scientists, doctors, and companies who brought them to us.

### Editorial Review

#### From [Booklist](#)

This book is organized chronologically, beginning with entries on the use of Herbs and Alcohol from the dawn of mankind and ending with a glimpse at the future with a discussion of Female Viagra and Gene therapy. Entries consist of a few paragraphs on one page, with a photo or illustration on the facing page. Handy see also references appear at the end of each article. There is a brief bibliography for each entry located at the back of the book, and a thorough index leads browsers directly to key people and specific drugs. As with others in the series (The Medical Book, 2012), this is not a comprehensive reference book, but it would make an excellent starting point for student researchers and is very browsable for the general reader. Recommended for most public libraries. --Rebecca Vnuk

#### Review

" . . . an excellent starting point for student researchers and is very browsable for the general reader. Recommended for most public libraries." —*Booklist*

### About the Author

Michael C. Gerald, PhD is Professor Emeritus of Pharmacy at the University of Connecticut and has served as Dean of the school.
