Foundations of Real Estate Financial Modelling By Roger Staiger

Foundations of Real Estate Financial Modelling is specifically designed to provide an overview of pro forma modelling for real estate projects. The book introduces students and professionals to the basics of real estate finance theory before providing a step-by-step guide for financial model construction using Excel. The idea that real estate is an asset with unique characteristics which can be transformed, both physically and financially, forms the basis of discussion.

Individual chapters are separated by functional unit and build upon themselves to include information on:

- Amortization
- Single-Family Unit
- Multi-Family Unit
- Development/Construction Addition(s)
- Waterfall (Equity Bifurcation)
- Accounting Statements
- Additional Asset Classes

Further chapters are dedicated to risk quantification and include scenario, stochastic and Monte Carlo simulations, waterfalls and securitized products. This book is the ideal companion to core real estate finance textbooks and will boost students Excel modelling skills before they enter the workplace. The book provides individuals with a step-by-step instruction on how to construct a real estate financial model that is both scalable and modular.

A companion website provides the pro forma models to give readers a basic financial model for each asset class as well as methods to quantify performance and understand how and why each model is constructed and the best practices for repositioning these assets.

Users Review

From reader reviews:

Sylvia Dozier:

Nowadays reading books be than want or need but also turn into a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The information you get based on what kind of book you read, if you want send more knowledge just go with schooling books but if you want feel happy read one having theme for entertaining for instance comic or novel. The actual Foundations of Real Estate Financial Modelling is kind of reserve which is giving the reader unpredictable experience.

Victor Green:

Spent a free time for you to be fun activity to try and do! A lot of people spent their leisure time with their family, or their very own friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Might be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to consider look for book, may be the book untitled Foundations of Real Estate Financial Modelling can be fine book to read. May be it is usually best activity to you.

Floyd Eichner:

Is it anyone who having spare time in that case spend it whole day simply by watching television programs or just resting on the bed? Do you need something new? This Foundations of Real Estate Financial Modelling can be the response, oh how comes? A book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these publications have than the others?

Michael Sherman:

What is your hobby? Have you heard that question when you got college students? We believe that that question was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you know that little person including reading or as studying become their hobby. You need to understand that reading is very important along with book as to be the thing. Book is important thing to provide you knowledge, except your teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you take to be your object. One of them is this Foundations of Real Estate Financial Modelling.
